

Since inception, Automann has been engaged in manufacturing & exporting a wide range of automotive parts such as axels, suspensions, engine parts, slack adjusters and other related components for trucks, trailers & cars in Africa & Asia. With over 20 years experience in Automotives, today we at Automann strive to be a leader in the field. Quality Assurance at Automann has always surpasses any other consideration that a customer has ever recognized and is, therefore, always manifested in every aspect of Product that is designed and manufactured at Automann – following unparallel commitment in Engineering, unequaled quest for precision in Manufacturing and uncompromised standards in Quality Management.

Automann suspension are strong, robust and long lasting... the idea suspension for the rugged African conditions.
